Projects & Publications

Module 1: Personal Developer Web Platform

A dynamic web application constructed using the Flask framework in Python 3.10+. Architected with modular Flask Blueprints, responsive HTML5/CSS3 templates, and a clean, decoupled MVC layout serving production assets on port 8080.

- Framework:** Flask (Python 3.10+)
- Design:** Responsive CSS, Blueprints modular routing
- Repository:** Managed via Git version control

Luke Ellman

Associate Partner Engagement Specialist | AI & Software Engineering

Welcome to my developer portfolio. I focus on building scalable software applications, backend data pipelines, and exploring practical machine learning systems. This site serves as a central repository for projects completed during my software concepts coursework.

Currently expanding technical expertise in Python architectures, full-stack frameworks, and data engineering systems.
